QuickFix

Perfect printer fastening in Notebook cases for printer HP DJ 460

The printer fastening „QuickFix", which was specially designed for DICOTA case solutions, provides the printer with a safe stand during transport or use on the job due to its high-class material (aluminum) as well as its stable form. Thanks to its high functionality „QuickFix" supports the flexible usage on the go. The printer fastening is attached to the case lid, thus ensuring that the printer and the cables have their distinct position and are protected from possible damage during transport. Additionally, the sophisticated construction simplifies the installation and removal of the printer.

Due to a flexible fastening appliance QuickFix for the printer HP DJ 460 can be used individually in following DICOTA case solutions:

DataBox Allround, DataBox Allround XL, DataBox Profile and DataCart.
